

Q1) a) Inorder traversal is: $x/y + 3 * b / c$

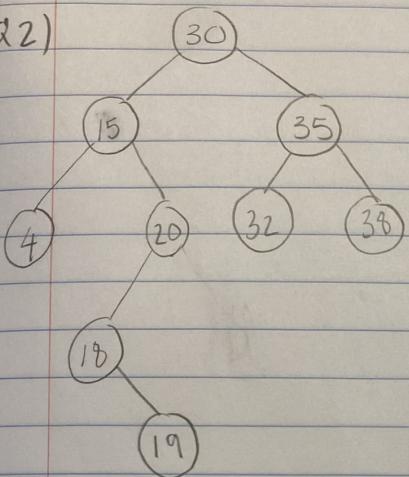

b) Postorder traversal is: $xyz + ab - c *$

c) PreOrder traversal is: $* + a - xy / cd$

Q2)

- 30 is the root because it is the starting value
- we can ignore all NUC
- The value to the left must be smallest and closest value on the list and the value to the right must be the largest and closest value on the list
